

# Building the Great River Landing

## Community Meeting – Wednesday, August 20<sup>th</sup> at 6pm

Irving Pertzsch Elementary School, 524 Main Street – in the Community Room

The City of Onalaska's Waterfront Committee will host a Community Meeting as a first in the series of public involvement opportunities regarding the Onalaska waterfront and the Great River Landing.

From August through October, the City will host this Community Meeting and a three day Charrette or intensive collaborative design and planning session (Sept 29 - Oct 1), culminating in a schematic design for Onalaska's waterfront.

During the several months that follow, the City's consultant team, along with the Waterfront Committee, will advance the design through preliminary engineering and cost estimation.

The Community Meeting agenda will cover project background and history, the planning and charrette process and an inspirational waterfront presentation.
